PROFILE

Software engineering student with experience in software quality and business analysis at Tata Consultancy Services. I connect business requirements with technical delivery, work daily in agile Scrum teams and build web projects with JavaScript, Node.js, HTML/CSS and Three.js. C1 English (EF SET), with a background in technical support and integrations across web platforms.

EXPERIENCE

Oct 2025- Current
Quality Business Analyst / Champion *Tata Solution Services (TCS)*

I managed end-to-end quality assurance processes to ensure alignment between business requirements and technical delivery. I coordinated testing resources, managed defect identification and prioritization, and kept test documentation and progress reports up to date in Jira. I worked closely with cross-functional agile teams, leading daily testing activities and client-facing status meetings.

Jul 2025- Oct 2025
Quality Assurance Analyst/Tester *Tata Solution Services (TCS)*

I carried out manual functional testing on software features to verify they met requirements and quality standards. I documented test cases, reported bugs in a timely and accurate manner and tracked issues in Jira. As part of an agile Scrum team, I attended daily stand-ups and sprint planning sessions and worked with developers and project managers to improve testing processes.

Aug 2024- Jul 2025
Tech Advisor *Teleperformance*

I implemented Meta Pixel, Conversions API, catalogues and CRM integrations on WordPress, Shopify and PrestaShop, guided to a commercial and marketing environment, connecting these platforms with the biggest social network in the world.

May 2022-Jan 2024
Premium technical support & sales representative *Asurion*

I delivered comprehensive assistance to customers with phones, tablets, computers and televisions, developing strong skills in the quick detection and resolution of technical issues, from software failures to hardware malfunction.

Feb 2021-Feb 2022
Customer service representative *Teleperformance*

I provided multichannel support by phone, email and real-time chat, covering package tracking, order reception and management, verification of fraudulent transactions and coordination with marketplaces to verify user orders.

Jan 2020- Dec 2020

Seller - Invoice clerk - Blog writer *TuBici Bike Shop*

I managed the entire process of online sales, including e-billing for each sale, and wrote blog posts for the website to improve sales strategies and increase brand visibility.

PROJECTS

2026

Interactive 3D portfolio *Three.js, Vite, GSAP, JavaScript*

I designed and built a museum-themed portfolio with 3D figures, a starfield and animated modals for About, Projects, Experience and Contact. The site is fully responsive and includes a contact form with validation, a spam-trap field and loading, error and success states.

EDUCATION

Jan 2024- currently

Software Engineering *Fundación Universitaria Compensar*

Jan 2017-Dec 2022

Modern Languages degree *Universidad ECCI*

CERTIFICATIONS

Jun 2025

Information Technology Fundamentals (IBM)
